

INNOVAL OS · HOW I RUN IT

I'm not technical. 7 AI agents run my business.

01

Innoval OS · the whole team

My business runs on 7 AI agents.

Each one has one job and a desk.

Every one proposes. I approve.

AGENTS 7 HUMANS 3

Next: the router and the chief of staff →

02

Router + Chief of Staff

Every request goes to one front door.

The router hands it to the right agent. Chief of Staff keeps priorities, chases what's open and sends my morning brief before 7am.

Next: marketing →

03

Marketing

Drafts the week's posts.

It writes the drafts and builds the slides.
Nothing goes out without my yes.

Next: sales & leads →

04

Sales & Leads

Tracks every lead.

It keeps the pipeline current
and drafts the follow-up for me to check.

Next: delivery →

05

Delivery

Runs the builds.

It does the work and opens a pull request.
I approve the merge.

Next: finance and R&D →

06

Finance + R&D

Reads the books. Tests the tools.

Finance reads the books and flags what needs me.
R&D tests new tools before we trust them.

Next: the rule →

07

The rule

One rule runs the whole team.

Every agent proposes. I approve.

7 AGENTS · 3 HUMANS KEEPING IT HONEST

Save this. Then write down the 3 jobs you'd hand to an agent first.
